Microsoft Teams Administration

System Administrator's Management Guide

© 2025 Dan Mill Training

> **Microsoft Teams is the collaboration hub for Microsoft 365** that combines chat, meetings, calling, and file sharing. As a sysadmin, you manage policies, security settings, user access, and integration with other Microsoft 365 services.

What is Microsoft Teams?

Microsoft Teams is a unified communication and collaboration platform that serves as the digital workspace for organizations. It integrates with SharePoint for file storage, Exchange for calendar integration, and provides persistent chat, video meetings, and voice calling capabilities.

Teams Structure

Level	Description	Purpose
Organization	Tenant-wide Teams environment	Global policies and settings
Team	Group of users working together	Project, department, or topic-based collaboration
Channel	Topic-specific conversations within a team	Organize discussions and files by subject
Tab	Applications and content within channels	Quick access to files, apps, and websites
Chat	Direct messages between users	Private conversations and small group discussions

Core Administrative Tasks

User & Team Management

- Enable/disable Teams for users
- Manage team creation permissions
- Configure team templates and policies
- Handle team lifecycle and archiving
- Manage guest access and external users

Meetings & Calling Administration

- Configure meeting policies and settings
- Manage phone system and calling plans
- Set up conference bridges and rooms
- Configure live events and webinars
- Manage recording and transcription

Apps & Integration Management

- Control app installation and permissions
- Manage custom and third-party apps
- Configure app setup policies
- Handle Power Platform integration
- Manage connectors and bots

Security & Compliance

- Configure data loss prevention (DLP)
- Manage retention and archiving policies
- Set up conditional access controls
- Monitor usage and security reports
- Handle eDiscovery and legal holds

Key Policy Types

Teams Policy
Team creation, management, and settings

Meeting Policy
Meeting features and participant controls

Messaging Policy
Chat features and message controls

Calling Policy
Voice calling features and restrictions

App Setup Policy
Available apps and installation rights

Live Events Policy
Broadcasting and webinar capabilities

Teams Integration with Microsoft 365

SharePoint
File storage and collaboration

Exchange
Calendar and email integration

OneDrive
Personal file sharing

Power Platform
Custom apps and workflows

Azure AD
Identity and access management

Yammer
Enterprise social networking

Stream
Video hosting and sharing

Planner
Task and project management

> **Bottom Line:** Teams administration requires understanding its deep integration with Microsoft 365 services. Focus on governance policies, security controls, and user enablement while maintaining compliance and organizational standards across the collaboration platform.
